

Quarterly Progress and Performance Indicators Report:

Project Number and Title: 1.12, Improved UAV-Based Structural Inspection Techniques and Technologies for Northeast Bridges

Research Area:

PI: *Eric Landis, University of Maine*

Co-PI(s): *Alex Friess, Ali Shirazi, University of Maine*

Reporting Period: 7/1/21 – 9/30/21

Submission Date: 9/30/21

*****IMPORTANT:** *Please fill out each section fully and reply with N/A for questions/sections with nothing to report. For ease of reporting to the USDOT, please do not remove, or change the order of, any sections/text. You may remove/add each rows in tables as needed. Thank you! ***
The report is due on the last day of the reporting period in .doc format to tidc@maine.edu.*

Overview:

Provide **BRIEF** highlights of activities performed during the reporting period. This summary should be written in lay terms for a general audience to understand. This should not be an extensive write up of findings (those are to be included in the final report), but a **high-level overview of the activities conducted during the last three months no more than 3 bullet points at no more than 1 sentence each**

- *Focused on developing AI-based tools for rapid condition assessment using different types of imaging.*
- *Developed parameters for better matching mission objectives with hardware requirements and limitations.*

Meeting the Overarching Goals of the Project:

How did the previous items help you achieve the project goals and objects? Please give one bullet point for each bullet point listed above.

- *Advancement in this field requires some more mundane aspects be automated. The uniqueness of each structure prohibits routine automation, and as such, algorithms for rapid data analysis must carry a high level of sophistication.*
- *Mission optimization will be central to improving both inspection productivity and assessment reliability.*

Accomplishments:

List any accomplishments achieved under the project goals in bullet point form...

- *Nothing significant to report for this period.*

Task Progress and Budget:

Complete the following tables to document the work toward each task and budget (add rows/remove rows as needed, make sure you complete the Overall Project progress row and include all tasks even if they have ended or have not been started)...

Table 1: Task Progress

Task Number: Title	Start Date	End Date	% Complete
Task 1: <i>Review of Current Regional Practice</i>	10/1/20	12/31/20 / 3/31/21	100%
Task 2: <i>Survey of Commercially Available UAVs appropriate for Applications</i>	10/1/20	12/31/20 / 4/30/21	100%
Task 3: <i>Prototype Development</i>	10/1/20	5/31/21	100%
Task 4: <i>Image array packages</i>	1/1/21	9/30/22	20%
Task 5: <i>Adv. Data interp.</i>	1/1/21	9/30/22	20%
Task 6: <i>Laboratory trials</i>	3/1/21	9/30/22	0%
Task 7: <i>Field trials</i>	6/1/21	9/30/22	0%
Task 8: <i>Field validation</i>	TBD	TBD	0%
Overall Project:	10/1/20	9/30/22 (phase I)	
		9/30/23 (phase II)	

Table 2: Budget Progress		
Project Budget	Spend – Project to Date	% Project to Date (include the date)
\$566,743	Vu?	?

Is your Research Project Applied or Advanced?

- Applied** (*The systematic study to gain knowledge or understanding necessary for determining the means by which a recognized and specific need may be met.*)
- Advanced** (*An intermediate research effort between basic research and applied research. This study bridges basic (study to understand fundamental aspects of phenomena without specific applications in mind) and applied research and includes transformative change rather than incremental advances. The investigation into the use of basic research results to an area of application without a specific problem to resolve.*)

Professional Development/Training Opportunities:

Describe any opportunities for training/professional development that have been provided. Did you provide a training to a State DOT/AOT or industry organization? What was the training? When was it offered? How many people attended? Did you meet with a State DOT/AOT or industry organization to inform them of your findings and how these findings could help their organization? When? How many attended the meeting?

- N/A

Technology Transfer:

*Complete all of the tables below and provide additional information where requested. Please provide ALL requested information as this is one of the most important sections for reporting to the USDOT. **ONLY provide information relevant to this reporting period.***

Use the table below to complete information about conference sessions, workshops, webinars, seminars, or other events you led/attended where you shared findings as a result of the work you conducted on this project:

Table 3: Presentations at Conferences, Workshops, Seminars, and Other Events

Type	Title	Citation	Event	Location	Date(s)

Use the table below to report any publications, technical reports, peer-reviewed articles, newspaper articles referencing your work, graduate papers, dissertations, etc. written as a result of the work you conducted on this project. Please list only completed items and exclude work in progress.

Table 4: Publications and Submitted Papers and Reports				
Type	Title	Citation	Date	Status

Answer the following questions (N/A if there is nothing to report):

- Did you deploy any technology during the reporting period through pilot or demonstration studies as a result of this work? If so, what was the technology? When was it deployed?
N/A
- Was any technology adopted by industry or transportation agencies as a result of this work? If so, what was the technology? When was it adopted? Who adopted the technology?
N/A
- Did findings from this research project result in changing industry or transportation agency practices, decision making, or policies? If so, what was the change? When was the change implemented? Who adopted the change?
N/A
- Were any licenses granted to industry as a result of findings from this work? If so, when? To whom was the license granted?
N/A
- Were any patent applications submitted as a result of findings from this research? If so, please provide a copy of the patent application with your report.
N/A
- Based on project results, were any industrial contracts awarded for additional research and development activities? If so, when? How much was awarded? Who awarded the contract?
N/A

Describe any additional activities involving the dissemination of research results not listed above under the following headings:

Outputs:

N/A

Outcomes:

N/A

Impacts:

N/A

Participants and Collaborators:

Use the table below to list individuals (compensated or not) who have worked on the project other than students.

Table 5: Active Principal Investigators, faculty, administrators, and Management Team Members				
Individual Name & Title	Dates involved	Email Address	Department	Role in Research
Eric Landis	landis@maine.edu	CIE	PI	
Alex Friess	Wilhelm.friess@maine.edu	MEE	Co-PI, Capstone Design Leader	
Ali Shirazi	shirazi@maine.edu	CIE	Co-PI, Data science, AI	

Use the table below to list **all** students who have participated in the project during the reporting period. (This includes all paid, unpaid, intern, independent study, or any other student that participated in this project.) **ALL FIELDS ARE REQUIRED.**

Table 6: Student Participants during the reporting period								
Student Name	Start Date	End Date	Advisor	Email Addresses	Level	Major	Funding Source	Role in research
Zahra Ameli		PhD	Civil Eng.	Grad. Research Asst.	Zahra Ameli	zahra.ameli@maine.edu	PhD	Civil Eng.
Yugandhar Aremanda		PhD	Mech Eng.	Grad. Research Asst.	Yugandhar Aremanda	yugandhar.aremanda@maine.edu	PhD	Mech Eng.

Use the table below to list any students who worked on this project and graduated or received a certificate during this reporting period. Include information about the student's accepted employment (i.e. the student is now working at MaineDOT) or if they are continuing their students through an advanced degree (list the degree and where they are attending).

Table 7: Students who Graduated During the Reporting Period			
Student Name	Degree/Certificate Earned	Graduation/Certification Date	Did the student enter the transportation field or continue another degree at your university?

			Please list the organization or degree

Use the table below to list any students that participated in Industrial Internships:

Table 8: Industrial Internships			
Student Name	Degree/Certificate Earned	Graduation/Certification Date	Did the student enter the transportation field or continue another degree at your university?
			Please list the organization or degree

Use the table below to list **organizations** that have been involved as partners on this project and their contribution to the project.

Table 9: Research Project Collaborators during the reporting period						
Organization	Location	Contribution to the Project				
		Financial Support	In-Kind Support	Facilities	Collaborative Research	Personnel Exchanges
VHB	Augusta, ME (and others)		x		x	

Use the table below to list **individuals** that have been involved as partners on this project and their contribution to the project. *(List your technical champion(s) in this table. This also includes collaborations within the lead or partner universities who are not already listed as PIs; especially interdepartmental or interdisciplinary collaborations.)*

Table 10: Other Collaborators				
Collaborator Name and Title	Contact Information	Organization and Department	Date(s) Involved	Contribution to Research
Dale Peabody, Director, Research & Innovation	dale.peabody@maine.gov	Maine DOT		Technical champion

Use the following table to list any transportation related course that were taught or led by researchers associated with this research project:

Table 11: Course List

Course Code	Course Title	Level	University	Professor	Semester	# of Students
CIE 110	Materials	Undergrad	UMaine	Landis	Fall 2021	126

Changes:

We were not able to get out in the field this period as planned due to delays on the part of the collaborator, who oversees the field activities. We hope to get out in the field during this next project period.

Planned Activities:

Participate in UAV-based inspections with industrial partners, test prototype drone in field, continue to work on optimizing appropriate sensor array packages, automated data analysis systems.
